Professional Summary

Angular Developer at Leadrat CRM. Proficient in HTML, CSS, JavaScript, React , Angular, JS, Python, Django, and Django Rest Framework, I specialize in dynamic web solutions. Expert in front-end design, I create appealing interfaces with HTML, CSS, and React JS. Back-end proficiency in Python, Django, and Django Rest Framework enables secure, scalable development, complemented by **fundamental Node.js and Express expertise**.

Education

Year	Degree/Examination	Institution/Board	CGPA/Percentage
2021	Bachelor of Computer Applications (Computer Science)	Sanpada Commece And Technology	8.11/10.0
2018	Intermediate (Class XII)	Arya Gurukul International Collage	57.47%
2016	Matriculation (Class X)	Shree Vivekanand Hindi High School	67.4%

Internship and Certifications

Udemy | The Complete Data Structures and Algorithms in Python   August 2022 - July 2023
• Completed comprehensive online course on Udemy, gaining proficiency in fundamental data structures and algorithms.
• Demonstrated understanding of key concepts such as arrays, linked lists, stacks, queues, and hash tables.
• Acquired problem-solving skills through algorithm design and analysis, including time and space complexity considerations.
• Implemented various sorting and searching algorithms, including merge sort, quicksort, binary search, and more.
Tech Stack: Python

Newton School | Full Stack Web Development || Bootcamp Traning   August 2022 - Present
• Full Stack Web Development along with Data Structures ,Algorithms and Problem Solving.
• Technical Stack learnt: HTML, CSS, JavaScript, ReactJS
• Participated in coding contest held by Newton School
• Worked on real time projects
Tech Stack : DSA,HTML,CSS,JavaScript,Node Js,Express Js.

Care24 | Internship Certification || Python Django Jr Developer   March 2022 - June 2022
Roles and Resposibilities
• working on django framework,python,PostgreSQL'
• API Integration for CRM Dashboard.
• Writing and resolving Database queries and SQL queries.
Tech Stack: Python , Django , Django Rest-Framework, Postgres-SQL

Maxgen Technology | Python Django Certification   August 2021 - February 2023
• Completed comprehensive training in Core Python, Advanced Python, and Django framework.
• Acquired proficiency in Core Python, Advanced Python, and Django.
• Demonstrated knowledge and understanding of fundamental programming concepts through Core Python.
• Developed skills in implementing complex functionalities using Advanced Python.
• Utilized Django framework for rapid development and seamless integration in web applications.
• Equipped with the ability to design and implement efficient solutions using the Core Python, Advanced Python, and Django tech stack.
• Ready to contribute to challenging projects in web development, leveraging my skills and knowledge gained from the training.
Tech Stack : Core Python, Advance Python, Django

Projects

My-Portfolio | self (link)   January 2024 - January 2024

Description: This portfolio website showcases a strong command of React, modern web development practices, and an eye for creating engaging user experiences through responsive design and thoughtful UI/UX elements.
• Built a modern and responsive portfolio website using React to showcase projects and skills effectively.
• Leveraged the power of React Hooks, including useState, useEffect, useRef, useReducer, etc., for efficient state management and dynamic UI updates.
• Designed and implemented Custom React Hooks to encapsulate logic and promote code reuse across different components.
• Utilized the Context API and useContext Hook to manage global state and provide seamless data sharing between components.
• Employed React Portals to create smooth and efficient rendering of modal dialogs and overlays.
• Developed Re-usable Components with a focus on modularity and maintainability, enhancing the website's scalability.
Tech Stack: HTML, CSS, JavaScript and **React**, JSX..

Interviewpreparation | self (link)   November 2023 - November 2023
Project Overview:
• Developed a comprehensive interview preparation website focused on programming questions using Angular.
• Designed an intuitive and user-friendly interface to enhance the learning experience.
Key Features:
• Curated a vast collection of programming interview questions covering diverse topics.
• Implemented a dynamic blog section to provide in-depth explanations and solutions for each question.
• Integrated user-friendly features such as search functionality, and progress tracking.
Tech Stack: HTML, CSS, JavaScript , Angular, Firebase, API.

SpaceX Data Landing Page | BrainStorm (link)   September 2023 - September 2023
Description:
• Developed a responsive landing page using React to display real-time data about SpaceX Rockets or Capsules.
• Implemented a user-friendly search form with three filters (status, original launch, type) to enable users to find relevant information efficiently.
• Designed a modern and visually appealing banner layout to showcase UI design skills.
• Utilized Semantic HTML and adhered to SEO best practices to improve search engine visibility.
Tech Stack: HTML, CSS, JavaScript ,React JS , JSX, API.

Blog Application | self (link)   July 2023 - July 2023
Description: Designed and developed a minimalist blog application homepage using React, showcasing foundational skills in front-end web development.
• Utilized React components to efficiently structure and render blog post previews, enhancing the user experience through organized and easily digestible content.
• Implemented clickable post previews with smooth hover transitions, creating an interactive and engaging browsing experience for users.
 Tech Stack: HTML, CSS, JavaScript and React ,Redux Toolkit,JS, JSX, API.

Meesho-Clone | | self (link)   June 2023 - June 2023
Feature: User can login via number. User can add required product to cart then go for payment.
Description: The project is an e-commerce website clone of Meesho.com, designed to provide a user-friendly online shopping experience.
• It incorporates essential features such as filtration, cart page with quantity adjustments, and a secure payment page.
• The project encompasses multiple pages, including Homepage Payment page,All products page,Product details page,Cart page,Signup page:
• Redux Toolkit is utilized to securely store user login data, ensuring a seamless user experience across sessions.
• Data is fetched from an API to populate the website with up-to-date product information. API requests and responses are handled efficiently, ensuring a smooth user experience.
• Industry-standard best practices, such as code version control using Git, are followed to ensure code quality and maintainability.
Tech Stack: HTML, CSS, JavaScript and React ,Redux Toolkit,JS, JSX, API.

Content Management System | Care 24   March 2022 - March 2022
Features:
We can Add,Edit,Delete,Read Complete CRUD Base Project. This project based on Authentication and authorization at perticular user. Also have Search functionality so that we can search perticulat content.
Description: This is a Authentication System in this project User can Create Account and login to the website .
Tech Stacks Used: HTML , CSS , Python , Django..

─────────────────── Skills

Computer languages   HTML, CSS, Javascript, Python, SQL
Software Packages   AngularJS, Bootstrap, MySql, React, Django

Co-Curricular Activities

I obtained a Hackathon certificate. My hobby is to learn new technologies.
• Participated in coding challenge based on DSA held by Newton School.
• solved DSA problems on GeeksForGeeks.
• solved DSA problems on LeetCode.
